A

Absolute Rate Theory Applied to Rate of Growth of Pearlite 219
Discussion 1581
Accelerated Solidification in Ingots: Its Influence on Ingot Soundness 157
Correction 572
Discussion 1553
Adair, S. E., Jr., Hammond, J. P., and McHargue, C. J.: *Effects of Solid Solution Alloying on the Cold-Rolled Texture of Titanium* 1199
After-effect measurement and applications to Al 1655
After-Effects in Polycrystalline Cadmium 1652
Age Softening of Beta Brass 1240
Aging, low temperature, in Ti alloys 178
Ajo concentrates, treatment 633
Albert, P. A.: *Habit Plane of Beta in Alpha Titanium* 1449
Alexander, B. H., Rosi, F. D., and Dube, C. A.: *Mechanism of Plastic Flow in Titanium—Determination of Slip and Twinning Elements* 257
Allotropy in the Phase $ZrCr_2$ 304
Alpha Solid-Solution Area of the Cu-Mn-Sn System 723
Aluminum and aluminum alloys: Alnico permanent magnets, effect of macrostructure on 537
Al-3 pct Mg monocrystals, deformation bands in 559
Al-O equilibrium in liquid Fe 173
Al-Si alloys, distribution of Na in 679
coarse grained high purity, inhomogeneity in creep deformation of 1175
correlation between creep behavior and resulting structures in alpha solid solutions 324
deformation of high purity Mg in creep compared with Al 712
directional properties 451
dynamic formation of slip bands in. Discussion 733
flow and fracture characteristics of 24S-T4 as affected by strain thermal history 66
grain boundary attack, in hydrochloric acid and sodium hydroxide 911
grain boundary sliding, migration, and intercrystalline failure under creep conditions 305
high purity, importance of Fe in 821
influence of Al and Si deoxidation on strain aging of low carbon steel 1021
kink band formation during creep at high temperatures 1487
Np-Al intermetallic compounds 1460
residual stresses in 411
slip and grain boundary sliding in 217
stress-strain relations 1181
study of grain shape and other applications of stereoscopic microradiography. Discussion 741
subgrain formation 717
subgrain formation during creep 1166
Discussion 730
Ti-Al, cold-rolled sheet texture 1200
Ti-Al, mechanical properties of 267
Discussion 1561
Ti-Cr-Al, phase boundaries 253
torsional after-effect measurement and applications 1655
Aluminum-Oxygen Equilibrium in Liquid Iron 173
Amsterdam, M., Rothwarf, F., and Muldawer, L.: *Silver-Cadmium Beta and Zeta Phases* 1458
Anable, W. E., Rasmussen, R. T. C., and Banning, L. H.: *Tristage Crystallization Process for Utilizing Western Ferrophosphorus* 423
Analyses, chemical, slag-metal samples 185
Analysis of hydrogen in steel by thermal conductivity method 180
Analysis of Molten-Zone Refining 1531
Ananthanarayanan, N. I., and Libsch, J. F.: *Sintering of Ultrafine Ferromagnetic Powders* 79
Anantharaman, T. R., and Christian, J. W.: Discussion on *Transformation in Cobalt-Nickel Alloys* 729
Andersen, J. E., Halpern, J., and Samis, C. S.: *Kinetics of the Oxidation of Galena in Sodium Hydroxide Solutions Under Oxygen Pressure* 554
Discussion 1556
Anderson, C. T., Kimball, R. W., and Cattoir, F. R.: *Effect of Various Elements on Hot-Working Characteristics and Physical Properties of Fe-C Alloys* 525
Anderson, E. A., Jillson, D. C., and Dunbar, S. R.: *Deformation Mechanisms in Alpha Titanium* 1191
Anderson, S., and Bohon, R. L.: Discussion on *Thermal Conductivity Method for Analysis of Hydrogen in Steel* 1551
Anelastic Behavior of Pure Gold Wire 937
Ang, C-Y., and Wert, C.: *Some Properties of Columbium Containing Nitrogen* 1032
Annealing: effect on density and hydrogen occlusion of ferrous metals 44
magnetic, Co-Fe alloy 813
Annealing textures: Mo single crystals 300
Discussion 1569
Zr 288
Anodes, Cu, production in electric arc furnace 197
Antimony and antimony alloys: effect on deposition of Cu 1375
replica method for study of structure of Pb-Sb alloys 55
Arc-Furnace Equipment and Its Operation at the Kennecott Utah Refinery 197
Arc-melting furnace for Cr 64

Arsenic and arsenic alloys: effect on deposition of Cu 1375
Attainment of Equilibrium in Gas-Metal Reactions 191
Discussion 1550
Aust, K. T., Maddin, R., and Chen, N. K.: *Bending of Molybdenum Single Crystals* 1477
Aust, K. T., and Morral, F. R.: *Directional Properties of 2S Aluminum* 431
Austenite: determination by X-ray methods 1539
diffusion and solubility of boron in 1465
effect of carbon on volume fractions and lattice parameters of 203
effects of sample surface and X-ray diffraction camera geometry on determination of, in hardened steels 1529
retained, determined by X-ray methods 87
stabilization of austenite-martensite reaction in high Cr steel 530
Austenite-martensite transformation: effect of Ni and Mo on stabilization of 922
theoretical analysis 1503
Austenite-pearlite interface, mechanism of growth 220
Autoradiographs, Al-Si alloys 679
Averbach, B. L.: *Retained Austenite Determinations by X-ray Methods* 87
Averbach, B. L., Cohen, M., and Conard, G. P., II: *Plastic Bending of Zinc Crystals* 1036
Averbach, B. L., Seigle, L. L., and Cohen, M.: *Thermodynamic Properties of Solid Nickel-Gold Alloys.* Discussion 728
Aziz, P. M., Markson, I., and Barrett, C. S.: *Torsional After-Effect Measurement and Applications to Aluminum* 1655

B

Backofen, W. A., and Hundy, B. B.: *Torsion Texture of 70-30 Brass and Armco Iron* 61
Baes, C. F., Jr., and Kellogg, H. H.: *Effect of Dissolved Sulphur on the Surface Tension of Liquid Copper* 643
Baghouse in zinc smelting 1633
Bain distortions, transformation by 1506
Bakelite mounts, effect on mounting Ti alloys in 179
Ball, C. J. P., et al.: *Further Progress in the Development of Mg-Zr Alloys to Give Good Creep and Fatigue Properties Between 500° and 650°F* 924
Balluffi, R. W.: Discussion on *Concentration Dependence of Diffusion Coefficients in Metallic Solid Solution* 726
Banning, L. H., Anable, W. E., and Rasmussen, R. T. C.: *Tristage Crystallization Process for Utilizing Western Ferrophosphorus* 423
Barrett, C. S.: *After-Effects in Polycrystalline Cadmium* 1652
Barrett, C. S., Aziz, P. M., and Markson, I.: *Torsional After-Effect Measurement and Applications to Aluminum* 1655
Barrett, C. S., and Hess, J. B.: *Transformation in Cobalt-Nickel Alloys.* Discussion 729
Bechtold, J. H.: *Effects of Temperature on the Flow and Fracture Characteristics of Molybdenum* 1469
Beck, L. H., and Smith, C. S.: *Copper-Zinc Constitution Diagram, Redetermined in the Vicinity of the Beta Phase by Means of Quantitative Metallography.* Discussion 748
Beck, P. A.: Discussions on: *Cold-Rolling and Annealing Textures of Molybdenum Single Crystals* 1569
Kinetics of Thermal Reorientations in Cold Rolled Zirconium 1573
Kinking in Zinc Single-Crystal Tension Specimens 737
Recrystallization of a Cold-Rolled Copper Single Crystal 1568
Becker, J. J., and Hobstetter, J. N.: *Orientation Relationships in the Recrystallization of Deformed Copper Single Crystals* 1235
Plastic Deformation of Single Crystals of Copper 1231
Bend Plane Phenomena in the Deformation of Zinc Monocrystals 49
Bend planes at end restraints 52
Bending of Molybdenum Single Crystals 1477
Bending, plastic, Zn crystals 1036
Bessemer converter, use of oxygen in. Discussion 1551
Bethune, A. W., and Pidgeon, L. M.: *Vapor Pressure of Zinc in the Reduction of ZnS by Cu and Fe* 804
Discussion 1558
Beu, K. E.: *Notes on the Determination of Retained Austenite by X-Ray Methods* 1539
Beu, K. E., and Koistinen, D. P.: *Effect of Sample Surface and X-Ray Diffraction Camera Geometry on the Determination of Retained Austenite in Hardened Steels* 1529
